Response to Amendment

1. The amendment filed on 8/24/05 has been entered. Claims 1-46 remain pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jong et al (US 6,192,403) in view of Cline et al (US 2002/0087897 A1).

Jong discloses a method of operating a computerized system to provide computer recommendation information for a plurality of computers, including the steps of generating an operation profile for a computer using machine information specific to the computer (col. 11, line 64 to col. 12, line 6), wherein the operation profile indicates at least a usage trend for the computer and generating a recommendation for at least one computer system solution which satisfies at least the projected requirements (col. 12, line 63 to col. 13, line 7). Jong further discloses the steps of generating the operation profile, receiving the machine information from the computer via a network connection (col. 2, lines 41-48), and Jong's system performance can be collected a intervals shorter than the first timed intervals as claimed. a system wherein the plurality of system options are provided by a plurality of third party solution providers (col. 5, lines 60-65), further include the steps of configuring the at least one computer system solution to indicate system specifications and a price (col. 6, lines 32-38). Jon does not disclose a computer

system solution based on the usage trend as claimed but Cline discloses determining projected requirements for at least one computer system solution based on the usage trend for the computer (page 3, [0038] – [0039]); further discloses future possible configurations for a computer system wherein a user of the system is allowed to make modifications to the configuration whether it's the specifications or price (page 3, [0034]).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the system solution based on the usage trend as taught by Cline into the system of Jong because it would provide such comprehensive control over operational states of a computer system.

Response to Arguments

4. Applicant's arguments with respect to claims 1-46 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments are moot in view of the newly added reference in Cline (US 2003/0087897 A1). Applicant's arguments about Jong are met by the newly added reference which determines the projected requirements of a computer system base on the usage trend. Claims 1-46 remain rejected.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Zomaya et al (US 2005/0010749 A1) disclose a system and method for providing computer upgrade information.
- Egan et al (US 2005/0066019 A1) disclose computer application and methods for automatic upgrade maintenance of computer hardware, operating systems and application software.
- Zomaya et al (US 6,711,676 B1) disclose a system and method for providing computer upgrade information.
- Chiu et al (US 2003/0177160 A1) disclose predictive system for self-managed E-Business infracstructures.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Laneau whose telephone number is (571) 272-6784. The examiner can normally be reached on Mon-Fri from 8:30am 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
